NICHE MEASURING INSTRUCTIONS

All measurements are taken at the exact spot in the niche where the partition/door will be installed.

IMPORTANT!
Measurements 3-4-5-6-7-8 are taken through the centre of the partition position in the niche

IMPORTANT!

- It is essential to measure the niche once it is fully finished, i.e. the corner beads are fitted and the niche edges are filled and sanded.
- Dimensions must be final.
- Only the floor covering may not yet be laid; in that case, measure from the concrete screed and also state by how many mm the floor will be raised.
- The centre of the partition/door must be at least 4 cm from the edge of the niche. If it is to be installed flush with the wall edge, additional fixing elements are required.
